Summary

I am a creative and result-oriented developer with experience in web applications. My primary focus is on the frontend in other to build Apps that create greats experience for users. Responsive web design in software development is my favorite and as a result, I create responsive and interactive websites. My design approach follows the mobile-first principle so as to give access and create better experiences for all users irrespective of their devices.

I have two years of learning and working experience in this field and I work with the following languages: HTML, CSS, JavaScript ES6+, and TypeScript.

I'm experienced using the following frameworks/libraries: Material-UI, Sass (SCSS), Styled-Components, Tailwind, React, Redux (Redux ToolKit), and Next.

I also make use of platforms/tools such as VS-Code, Git, GitHub, Bitbucket, Jira, and Slack.

Experience

Frontend Developer

Digiscript | Tech Solutions

Oct 2021 - Present (4 months +)

• Implementing frontend features of multiple web projects
